```
import fs from 'fs'

const srcDir = process.argv[2]

fs.readDir(srcDir, (err, files) => {

  if (err) {

    console.log(err)

  } else {

    for (const name of files) {

      console.log(name)

    }

  }

})
```

1 load library

2 get arguments

3 define function   4 start   5 finish   6 run
